Code for India

LETS CODE TO MAKE OUR LIFE BETTER
CODE FOR A BETTER GOVERNMENT

More than 50% of Indians are under 25 years of age.

By 2030, only 12% of India's workforce will be above 60 years of age.

According to the Confederation of Indian Industry (CII)...

Nearly 70%

of the unemployed people in India are educated, but lack the desired industry skills. Less than 10%

have recognized professional certifications.

An evolving education ecosystem needs a robust quality assurance framework.

Indian Government's initiative

- Success is almost synonymous with IT knowledge.
- Government is willing to spend on IT..
- Sakshat
 - They are willing to pay Rs.7000/pm to workers.
 - Spreading digital literacy for teachers empowerment (100 Cr project)
 - http://www.sakshat.ac.in/PDF/NewLink.htm
- Spoken tutorials project
- NPTEL
- Aakash tablets

Mandate – Spread IT

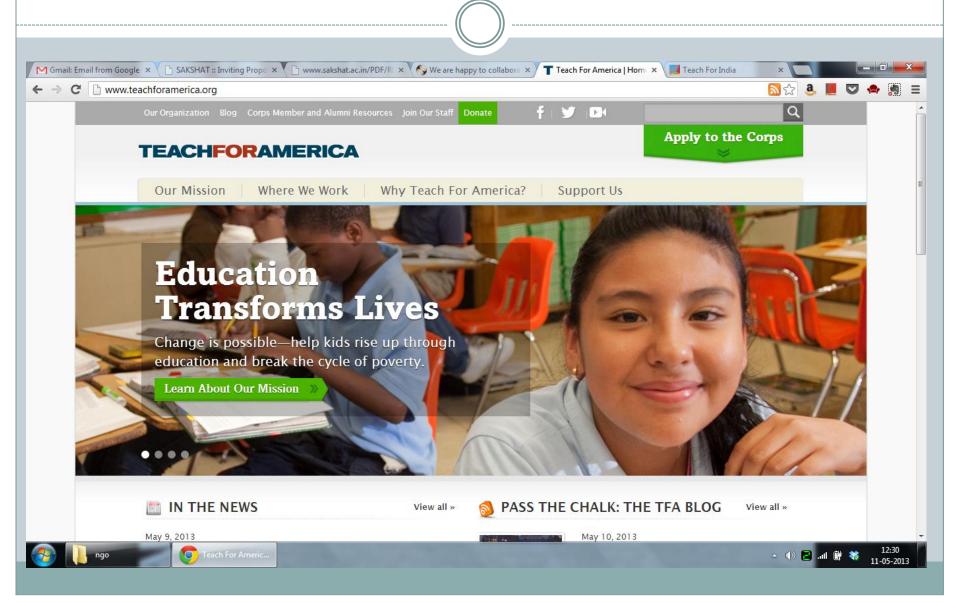

- Three potential subjects
- College students
 - o Arts, Commerce, Law
 - ➤ Basic IT skills like MS Office, Paint, Linux
- Villagers
 - o Very basic IT like reviews, train ticket, blogs, whether forecast.
- Government our current focus
 - Improve IT interfaces of government
 - Citizen partnership by making it free and open source(FOSS).

Feasibility

- Teach for America
- Teach for India

- Code for America
- Code for India

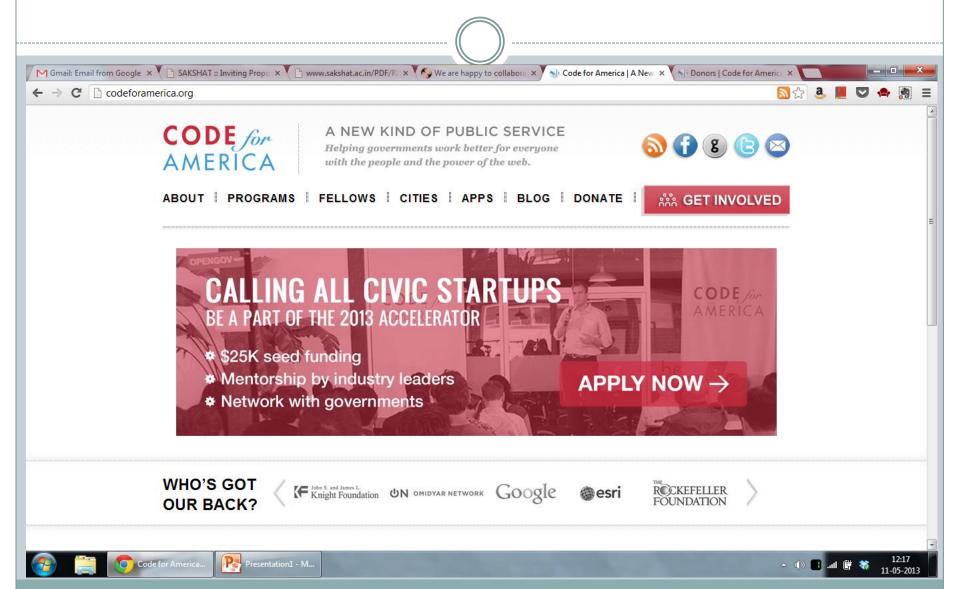

Teach for America

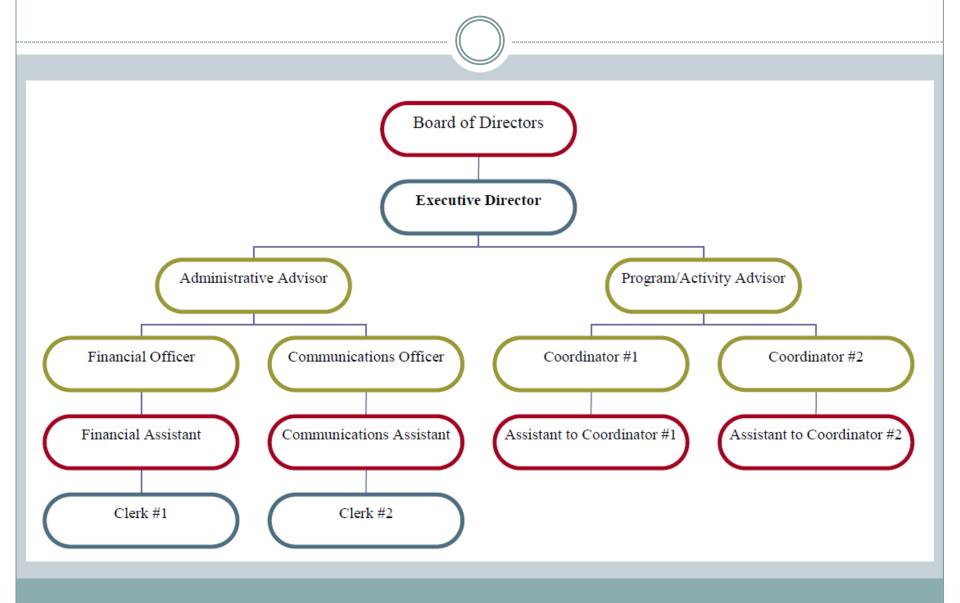

Teach for India
